Wp Super Cache

This plugin is a must have for two very important reasons. First, it makes your WP pages load lightning quick. If you've got a lot of graphics or big sites, this is critical to keeping your visitors from leaving too soon.

Second, it stores static versions of your site and uses a lot less CPU processing than if you just used WordPress by itself.

<http://wordpress.org/extend/plugins/wp-super-cache/>

Requires WordPress Version: 2.6 or higher

Compatible up to: 3.0.1

Last Updated: 2010-6-16

Average rating 4 

Akismet

I don't have to tell you what a pain in the backside spam comments are. Akismet stops them dead in their tracks. This is probably the one plugin that nobody should be without, especially if you plan on having a very popular blog and allowing comments by your visitors.

<http://wordpress.org/extend/plugins/akismet/>

Requires WordPress Version: 2.0 or higher

Compatible up to: 3.0.1

Last Updated: 2010-8-23

Average rating 4 

WpTouch Iphone Theme

With the Iphone being such a big thing today, this is a must have plugin. What it does essentially is this. If a person visits your site through an Iphone or some other mobile device, it displays a lighter version of the site specifically designed for mobile users.

<http://wordpress.org/extend/plugins/wptouch/>

Requires WordPress Version: 2.8 or higher

Compatible up to: 3.0.1

Last Updated: 2010-9-9

Average rating 4 

WP DB Manager

Database management is something that not very many people give a second thought to but it's critical to do, especially with all the hackers that are out there. This plugin has a lot of cool features in addition to backing up your database, including automatically emailing you a copy of your database each day.

<http://wordpress.org/extend/plugins/wp-dbmanager/>

Requires WordPress Version: 2.8 or higher
