

Yemen Universities And The IT Curriculum At Undergraduate Level

One of the important factors that decides the quality of undergraduate degree programs is the curriculum design. If you are joining undergraduate degree programs such as Bachelor of Information Technology, you need to be even more cautious in selecting your college and the university. If you happened to do your Information Technology courses from a university that uses outdated curriculum then your degree certificate will prove to be of no value to you at a later stage. Unfortunately, most of the students that search for their educational institution to join bachelor degree programs do not pay attention to this most important factor. They will be distracted with many other less important factors. If you too are searching for your university in Yemen for your IT graduation programs then you better pay attention to your IT curriculum.

The field of information technology is one of the fastest evolving fields. Many new inventions and technologies emerge almost on daily basis. It is therefore important that the universities update their curriculums to impart knowledge and train their students in the latest IT technologies.

Al-Nasser University, Yemen makes special efforts in designing its IT curriculum. Top scholars and educationalists are involved in the curriculum designing process. Al-Nasser University is regarded as the best practical university in Yemen and this is mainly because of the sound curriculum they have for all their degree programs and because of the way they deliver these courses. This university relies on practical approach to imparting knowledge. Students at Al-Nasser University get very good exposure, which makes them highly competitive in the job market. They get better job opportunities and get placed faster because of the competitive edge they have over the other candidates.

Students that do their Bachelor of Information Technology program in Al-Nasser University also have another great benefit. They have the option to enroll for dual degree program. They can now get two certificates within four years. Al-Nasser University collaborates with Aptech, one of the most popular IT institutes from India and offers Advanced Software Engineering Diploma to its IT students. The Aptech IT centre operates within the Al-Nasser University Campus. The curriculum for the advanced diploma course has been designed by a team of experts from Aptech India and Al-Nasser University. This curriculum considered one of the best IT curriculums in Yemen.

You can improve your career opportunities by joining the Bachelor of Information Technology Program in Al-Nasser University. This university enjoys global recognition. Students that have passed out of this stream are extremely happy with the curriculum and with the dual degree program option.

When you are joining your undergraduate degree program, you should make sure to find one such program that will give you very good career opportunities and the course that gives you good exposure. You will need to do your groundwork before you enroll for your degree programs so that you can find a substantial program like the one that is being offered at Al-Nasser University.
